**Fill out the entry
ticket**

Icebreaker

2 minutes

Question:

No two software engineering roles are the same, and we figure out our preferences with time. As of today, are you more drawn to **frontend**, **full stack**, or **backend** development (and why)?

Answer:

Share your answer in the Zoom chat below. What kinds of pets do you have if any? If you don't have any, share what type you would like to have, if any.

Your Feedback

Glow

- + Students feeling less anxiety around recursion.
- + TF shoutouts for support in breakout rooms!

Grow

- Some students looking for more breakout room time
- Some students looking for more mock interviews and [pre p services](#).

Announcements

- * **Peer Mock Interviews** today 👤👜 (Starting at the 15 min mark today)
 - We will review the flow and process in the next slides.
 - Today will be a fun day. Nothing is on the line, let's help each other practice!
 - Don't worry if you don't finish. We will stop on time so that the second student has equal time (use a timer).
 - The emphasis will be practicing the **UMPIRE** strategy.
 - Questions will involve strings and lists for today.

60 minutes

Peer Mock Interviews

Today's Mock Interviews

- * One student will act as the interviewer.
 - Guides the process by asking questions, clarifying requirements, and prompting the interviewee to think about edge cases or optimization.
 - Observes and takes notes for feedback but does not solve the problem.
- * The other student will act as the interviewee.
 - Solves the problem while thinking aloud and applying the UMPIRE steps.
 - Communicates their thought process clearly to the interviewer.

Peer Feedback

When there's ~5 minutes left, the interviewer should provide feedback:

- * One strength
- * One area for improvement

Interviewer Resources

- [TIP101 Peer Mock Interview Packet](#)
 - [Showrunner Guide](#): Outlines the general structure of the peer mock interview process
 - Interviewer Guides: UMPIRE walkthroughs to be referenced **only by the interviewer** for that problem
 - [Interviewer Guide #1](#)
 - [Interviewer Guide #2](#)

Breakout Rooms

30 minutes

Write a function that, when given two strings, **needle** and **haystack**, returns the index of the first occurrence of **needle** in **haystack**, or returns -1 if **needle** is *not* part of **haystack**.

* **Input:** haystack = "sadbutsad", needle = "sad"

Output: 0

* **Input:** haystack = "leetcode", needle = "leeto"

Output: -1

Breakout Rooms

30 minutes

Write a function that returns the **longest** common **prefix** string amongst an array of strings `strs`.

If there is no common prefix, return an empty string `""`.

* **Input:** `strs = ["flower", "flow", "flight"]`

Output: `"fl"`

* **Input:** `strs = ["dog", "racecar", "car"]`

Output: `""`

Discussion

3 minutes

In the chat . . .

How did we do? What did we do well? What are things we need to work on to improve?

Break Time!

Take 5 mins to step away from the computer. Feel free to turn off your camera and return promptly after 5 mins.

30 minutes

Collaborative Problem Solving

Breakout Rooms

60 minutes

1. 🏃 Navigate to your breakout room.
2. 🙌 Introduce yourselves!
3. 🧑💻 Work on the problems for your selected unit.

10 minutes

Wrap Up

One Good Thing

Let's reflect on today's session. Maybe you got a question answered, overcame a specific coding challenge, or learned how to do something completely new!

In the chat, share at least one good thing you've learned or experienced during the session today.

Let's celebrate together!

Session Survey Time!

Final Reminders

- ☐ Finish the problem sets for additional practice
- ☐ Take the weekly HackerRank assessment by Sunday @ midnight
- ☐ Visit a **Study Hall Session** to deepen your understanding, work through challenges, and connect with course material alongside your peers!
