**Fill out the entry
ticket**

Icebreaker

2 minutes

Question:

If you could have any superpower, what would it be? No wrong answers.

Answer:

Share your answer in the Zoom chat below. What kinds of pets do you have if any? If you don't have any, share what type you would like to have, if any.

Your Feedback

Glows

- + Tree intro session well received.
- + Students enjoying the problem set solution validator!

Grows

- Students looking for more BST practice
- Python cheat sheet feedback (more examples, less theory)

Announcements & Reminders

- * Reminder: Problem Set Solution Validator
 - <https://docs.google.com/document/d/1EfxBBJZPG1MSuAx9JC0uWBIMZh9HGcFY-e1kxxYS6Ws/edit?usp=sharing>
- * Mock interview today! Need one student volunteer. Topic is strings

35 minutes

Mock Interview

Today's Mock Interview

- * I will be the interviewer.
 - As the interviewer, I will simulate a realistic technical interview by asking probing questions and providing minimal hints when necessary.
- * A volunteer student will be the interviewee.
 - As the interviewee, you will think aloud while solving the problem, applying UMPIRE.
- * The rest of the class will observe: [Observation form](#)
 - Watch both the interviewee and the interviewer to get into the interviewer mindset, this builds skills you'll need for the peer-to-peer mock interviews next week (Week 9).

Mock Interview Process

1. **Quick intro** (name, school, major)
2. Interviewer **introduces the problem**
3. Candidate **opens link** to problem and **shares screen**
4. Candidate works through the **UPI steps** with interviewer
 - If you need to look something up, it's ok to Google it.
 - Say what you're thinking, what you're doing, and why.
 - Pay attention to feedback and hints from interviewer.
5. After: **Celebrate and recap** what went well!

If you are not the candidate. . .

- * Hold all comments (on mic or in chat) until the end
- * Imagine what you would do in the candidate's shoes
- * Write down and be ready to share:
 - 1 thing the candidate did that you will start doing too!
 - 1 thing you'll do differently now that you've seen this interview.

Evaluation Criteria

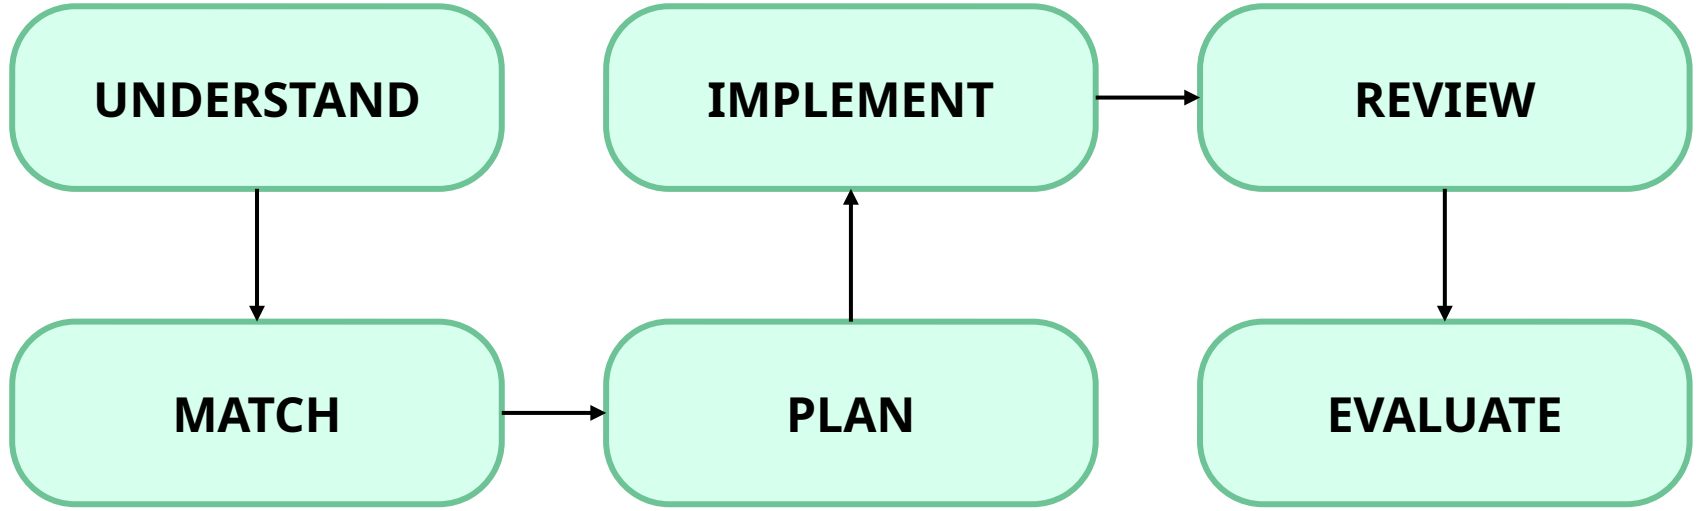

Key Areas of Focus

- * Clarity
- * Problem-solving process
- * Use of the UMPIRE framework

Reminders

- * Prioritize readability and logical flow over rushing to a solution.
- * Communicate effectively throughout to simulate a real-world technical interview scenario.

UMPIRE

Problem

Given a string `s`, find the first non-repeating character in it and return its index. If it does not exist, return **-1**.

Examples:

- * **Input:** `s = "leetcode"`
Output: `0`
- * **Input:** `s = "loveleetcode"`
Output: `2`
- * **Input:** `s = "aabb"`
Output: `-1`

Discussion

3 minutes

In the chat . . .

What was one thing the candidate did
that you will start doing too?

What is one thing you'll do differently now
that you've seen this interview?

Break Time!

Take 5 mins to step away from the computer. Feel free to turn off your camera and return promptly after 5 mins.

60 minutes

Collaborative Problem Solving

Breakout Rooms

60 minutes

1. 🏃 Navigate to your breakout room.
2. 🙌 Introduce yourselves!
3. 🧑💻 Work on the problems for your selected unit.

10 minutes

Wrap Up

One Good Thing

Let's reflect on today's session. Maybe you got a question answered, overcame a specific coding challenge, or learned how to do something completely new!

In the chat, share at least one good thing you've learned or experienced during the session today.

Let's celebrate together!

Session Survey Time!

Final Reminders

- ☐ Finish the problem sets for additional practice
- ☐ Take the weekly HackerRank assessment by Sunday @ midnight
- ☐ Visit a **Study Hall Session** to deepen your understanding, work through challenges, and connect with course material alongside your peers!
